

Reflection Paragraph:

My branding was inspired by simple and modern designs that look clean and professional. I chose a cream color palette with soft blue tones because it feels calm, neat, and easy to look at. The colors also help my work look more organized and consistent. Creating the logo was challenging because I wanted it to be simple but still unique and meaningful. I had to make sure it looked good in different sizes and platforms. I plan to use this branding in my GitHub profile, resume, and future school projects. This will help me present myself in a more professional way.
